Core Components

Get Started

- [Tutorial for building a new site using the Core Components](#)
- AEM product documentation of the Core Components
 - [Author documentation](#)
 - [Developer documentation](#)
- [adaptTo\(\) 2018 hands-on lab: Bootstrapping website development with Sling Models and HTL using Core Components](#)
- [adaptTo\(\) 2017 presentation of the Core Components \(incl. video recording\)](#)

Get Involved

- Checkout the Roadmap below, and for the top items, tell us about your needs and requirements.
- Subscribe to the [Component Round Table](#) to participate in sessions about the components.
- If anything is preventing you from being able to use a component, or if it has missing features or bugs, then please open an issue describing what you'd expect.
- To contribute, we welcome very much pull requests. If your contribution represents a larger effort, then please create an issue upfront to make sure that we agree on the intent, in order to avoid rejections of contributions because of disagreeing views.

Roadmap

Adobe is providing work-in-progress components as a technical preview. The components are found in the Sandbox folder. Please see the [development](#) branch.

Ordered Backlog

Keep in mind that based on feedback, the priorities can shift and different items to the ones planned here may be worked on.

- **Download** - new component, in RTC
- **Video** - new component, in RTC
- **Social Media** - new component, in RTC
- **Form validation** - new feature
- **Form show/hide** - new feature
- **Form** - enhancement
 - action to post JSON
 - various smaller enhancements/fixes
- **Page** - enhancement
 - allows to define a page image (in addition to the thumbnail)
 - image + teaser components to default to the page image when defined
- **Title** - enhancement
 - support anchor links
- **General** - enhancement
 - externalization of URLs in JSON
- **Container** - new component
 - unified parsys
 - optional responsive layout
 - optional content inheritance
- **Table of contents** - new component
 - nested list of title components with anchor support
